PETITION TO ALLOW MISSISSIPPI TO HAVE A PHILOSOPHICAL VACCINATION EXEMPTION

By: Mississippi Parents for Vaccine Rights

To be delivered to: MS State House, MS State Senate, Gov. Phil Bryant, and Lt. Gov. Tate Reeves

Mississippi currently discriminates against unvaccinated and partially vaccinated children by denying parents the right to a non-medical vaccine exemption. School and daycare entry is denied when a child is not vaccinated according to the required CDC schedule.

Parents are entitled to the right to refuse any and all vaccines, and still obtain a quality private or public education for their children. Parents deserve the right to informed consent, a basic principle of medical care, which states that a person has the right to all the facts regarding a medical procedure, and the right to either accept or refuse treatment.

Forty-eight other states have vaccine rights! Help Mississippi become the 49th with a philosophical vaccination exemption! No matter where you stand regarding vaccination, parents deserve the right to decide what is best for their child. It should always be the parent's choice.
