

BE THE VOICE OF VACCINE CHOICE

MISSISSIPPI PARENTS FOR VACCINE RIGHTS

- Children today typically receive 49 doses of 15 vaccines before kindergarten, beginning on their first day of life.
- Many of the diseases we vaccinate against are not seriously life threatening, however the vaccines are "unavoidably unsafe."
- Vaccine manufacturers and doctors cannot be held liable for vaccine injury or death.
- Vaccine inserts list these potential adverse reactions: asthma, diabetes, encephalopathy, eczema, ITP, multiple sclerosis, seizures and SIDS.
- The current mandatory vaccine schedule has NEVER been tested as it is administered to our children.
